---

2 Elementary

Total Enrollment: 394

### Mission Statement

The Lakeside Union School District is fully committed and devoted to furthering the education of our students in technology. The district has been building its technology resources for some time and is aware that the technological field is constantly changing. It is the goal of the district to stay informed and utilize every resource made available. By staying "ahead of the game" it will ensure that our students and staff members get the best information in order to enhance our learning environment. In order to achieve the school's goals our curriculum has undergone changes to reflect the frameworks and standards, which are in line with IASA, Improving America's Schools Act. This plan establishes the role technology will play in that effort over the next five years.

### Profile

Lakeside Union Elementary School District (LUESD) is one of the most unique school districts in the whole of the Golden State. Located in the quaint town of Hanford, the residents enjoy a semi-rural life while still only a 15 to 45 minute drive to the conveniences of the bigger cities of Visalia and Fresno. LUESD faces the challenge of educating many children who come to the school lacking many of the fundamental skills and background that are so necessary to help promote early success.
